Seat cover fabrics for trains and buses
Woven chromatic polyester velvets

Key features

Lantal's woven velvet seat cover fabrics in 100% Polyester Trevira CS (Comfort and Safety) have the following compelling advantages:

- **Customer-specific signature designs in dobby weaves**
- **Small-patterned graphic designs add charisma to interiors**
- **Noble surface sheen due to high yarn density**
- **Excellent processability thanks to fabric fineness and low weight**
- **Compliance with all relevant railway and bus safety requirements**
- **Long service life due to good abrasion resistance**
- **Simple cleaning of all upholstery components**

Specifications

Composition

The fabric is composed of 100% Polyester Trevira CS.

Typical applications

Seat covers, headrest covers.

Thanks to compliance with all fire safety regulations, the fabric can be deployed in any type of vehicle. A crisp brand presence can be attained by standardizing interiors.

Safety and standards

Lantal velvets are permanently flame-retardant; they comply with DIN 5510-2, EG 95/28 and FMVSS 302 fire standards and requirements.

Colors and designs

Development of customer-specific colors and designs for a unique signature ambiance.

Abrasion resistance

Lantal velvets fulfill all European wear standards.

Moisture absorption

Polyester fibers hardly absorb moisture and guarantee good moisture wicking.

Pile resilience

Very low susceptibility to wrinkling. The as-new impression of the vehicle interior is preserved for a very long time.

Lightfastness

Thanks to an optimized dyeing process, Lantal's velvets are very lightfast and comply with ISO 105-B02.

Cleaning

Washable with water and sponge or with a wet extraction unit at temperatures of up to 40°C. The fibers absorb virtually no moisture and therefore dry quickly after wet cleaning.

Service life

Lantal products have particularly long service lives and still look like new even after extended periods of use.
