**Dr. Urs Rickenbacher**  
Chief Executive Officer  
Lantal Textiles AG

*"We never stop searching for new ways to provide a better passenger experience and improved efficiency for our customers."*

**Stefan Meier**  
Head of Engineering  
Edelweiss Air AG

*"Thanks to Lantal's class-leading comfort, Edelweiss Air's business class passengers always arrive relaxed and refreshed."*

## Creating better ways to fly – Lantal's PCS

### Comfort without compromise

Edelweiss Air has been relying on Lantal's Pneumatic Comfort System since 2013 and is so completely convinced by its advantages that the airline will equip further 81 Thompson Vantage business class seats with Lantal's revolutionary air cushions in its completely overhauled A340s.

Lantal's pneumatic cushions offer Edelweiss Air's business class passengers outstanding comfort without compromising operating efficiency. With the PCS, Edelweiss Air can also cut fuel costs and increase revenues per seat.

### Highest reliability and weight reduction

Thanks to the unique PCS technology, business class passengers can individually adjust the firmness level of their seat to their personal preference. Furthermore, the PCS offers comfortable sleep and relaxation through the innovative massage and lumbar support system while saving weight at the same time.

The sum of lower weight, highest reliability, maintenance-free operation, and excellent performance over the entire service life make Lantal's PCS the winning choice for business class passengers and airlines alike.

### PCS key facts

- ✓ Highest reliability
- ✓ Outstanding comfort
- ✓ Adjustable firmness
- ✓ Lowest weight
