

Leathers

Artificial leather

Key advantages

Lantal artificial leathers have the following compelling advantages:

- **Exceptional longevity and durability even under heavy usage conditions**
- **Oil-resistant, water- and perspiration-repelling**
- **Subtly textured surface that resembles the grain of genuine leather**
- **Easy to clean and maintain**
- **Compliance with all airworthiness requirements**

Properties

Composition

Lantal artificial leathers are composed of 70% polyamide, 30% PVC.

Typical applications

Attendant and cabin seat covers and arm caps.

Design options

Lantal artificial leather can also be debossed with logos and pattern or other custom design element and design accents.

Colors

Lantal offers a selection of eight predefined colors. All colors are available off the shelf.

Weight

The conditioned weight is 780 g/m², 23 oz/sy, tolerance ±5%.

Width

140 cm, 55 in.

Properties

Flammability, smoke/toxicity

Lantal artificial leathers are permanently flame-resistant in accordance with FAR/CS 25.853, 12 sec. vertical if cleaned according to Lantal cleaning recommendations.

Cleaning

Clean occasionally with soapy water and a soft cloth or as per Lantal cleaning recommendations.

Service lifetime

Approx. 4 to 5 years

The specific service lifetime depends largely on routing (long-haul, short-haul), geographical routes, load factors and cleaning attitudes.
