

Ready-to-install products for buses Blackout printed

Key advantages

Lantal blackout curtains made of 100% polyester have the following compelling advantages:

- **Printable on both sides with individual designs**
- **Light blocking**
- **Washable**
- **Permanent pleats**
- **Inherently flame-retardant**
- **Compliance with all relevant safety regulations for buses**

Specifications

Composition

100% Polyester. Also suitable for producing antimacassars.

Individual designs and colors

Customized designs for signature interiors. Unlimited repeat length and no limits to design or color. Lantal is able to transfer your designs or photos onto our fabrics on both sides. There are no limits to transferring your inspirations to reality.

Lantal would be pleased to help you create your individual design or find an appropriate photorealistic visual.

Design data format

- TIF file (*.tif) preferred, minimum 150 dpi resolution on original size.
- 1 repeat with dimension data in cm (max. repeat width approx. 138 cm).
- CMYK colours, colour references in Pantone, NCS or RAL.

Pleated curtains

Suitable for heat set pleating. The pleating always remains in the same good shape, even after several cleaning cycles.

Weight and width

The conditioned weight is approximately 260 g/m², tolerance ±5%, the width is approximately 138 cm.

Safety and standards

Lantal's blackout curtains are permanently flame-retardant and comply with the fire standards and requirements according to UN-ECE-R118.01 / FMVSS 302.

Cleaning

Washable at max. 40°C or dry cleaning, as per Lantal cleaning recommendations.

Service life

Lantal products offer an exceptionally long lifespan and still look as good as new after longer-term use.

Ready-made products

On request, Lantal can deliver its curtains and anti-macassars ready-made. The carpets and antimacassars are shipped according to individual specifications and ready to install.

Lantal also offers other ready-made elements such as seat covers and pre-cut carpets.
