

Finishing for seat cover fabrics Antistain finish

Key advantages

Lantal finishing with antistain effect for seat cover fabrics shows the following compelling key advantages:

- **Double stain repelling effect: soil/stain repellent and easier release of soil/stain**
- **Seat cover fabrics stay clean for a longer time, and thus keep a long lasting perfect look even during intensive use**
- **Maintains the natural functionality of the fibres and absolutely identical seating comfort**
- **Compliance with all airworthiness requirements**

Antistain effect

Spilling a drink on the seat cover fabric is not a problem anymore. With the antistain effect of the finishing liquids just roll off the fabric without leaving any traces behind.

The antistain treatment is a fluorocarbon finishing which is repellent to oils and fluids and makes sure that fabrics stay clean for longer and look more beautiful even during intensive use.

At the same time, the natural breathability of wool is not reduced. Thus, the seating comfort remains the same.

Double stain repelling effect:

- **Soil/stain repellent:** Fluids do not ingress into the fabric and can be wiped off easily. Therefore, the underlying material (e.g. fireblocker, lamination, foam) do not get wet.
- **Soil/stain release:** dried stains can be dry-cleaned more easily.

Further advantages:

- Interior components become easier to handle and have a remarkably extended lifetime.
- With this treatment fabrics need to be cleaned less often.
- The finishing works even after 10 dry-cleanings.

Application area

The finishing can be applied to wool blend seat cover fabrics and to the yardage only. The application is also possible on stock fabrics.

The permanent flame-retardant properties remain unaffected by repeated cleaning cycles, abrasion and/or ageing.

A finishing with both effects (antistain and hygienic/antimicrobial) is possible.

Specifications

Lantal fabrics are permanently flame-resistant in accordance with FAR 25.853, 12 sec. vertical, and meet the Airbus and Boeing specifications for smoke and toxicity if cleaned according to Lantal cleaning recommendations. The finishing complies with REACH.
